

I travel for a living and I have a very difficult time picking up radio stations in my travels. I do not know local channels and I like the ability to get the local information on a town I am approaching. If I depend on the local channels (not XM) I am either not going to find the station, or not get coverage and I will not be able to benefit from the traffic tips. XM is clear and I do not have to continuously search for channels which makes it much safer for me driving, I am not distracted by the radio. I can leave Atlanta and drive to Cincinnati for instance without changing the channel. I pay for this service and I do not see the local stations in my area doing anything for me, I hope that you allow this service.

Thank You,
Chuck deVries
